Windows Small Business Server 2011
Standard

Secure and Protect Small Business Data with Windows® Small Business Server 2011 Standard

Designed and priced for small businesses with up to 75 users, Windows Small Business Server 2011 Standard delivers enterprise-class server technology in an affordable, all-in-one solution. SBS 2011 Standard helps protect your customer's business information from loss by performing automatic daily backups and allows them to be more productive by providing features like email, Internet connectivity, internal websites, remote access, and file and printer sharing.

Provide the right benefits to your small business customers

Increase Data and Network Protection. Help your customers focus on their core business objectives and increase their peace of mind by providing automatic local backup and restoration of all their business critical data on the server.

Deliver a Scalable Platform that Grows with the Business. As business needs change, SBS 2011 Standard enables your customers to grow and meet their changing demands with a highly scalable platform. Easily add users, servers and applications, or expand into other Microsoft technologies as business needs evolve.
Keep Your Customers Connected. Enable your customers to easily access email, contacts, and calendar to connect with their clients, vendors and suppliers seamlessly from virtually anywhere.

Benefits of Windows Small Business Server 2011 Standard includes:

- Automatic backup of business data and simple recovery features

- Affordable and easy to deploy, use and maintain

- Enterprise quality functionality and productivity capabilities

- Organize and access files from virtually anywhere

Windows Small Business Server 2011 Standard is a simple-to-manage, all-in-one on premise solution to meet your customers IT needs.

Windows Small Business Server 2011 Standard Features at-a-Glance

Product Features	Functions
Help Protect Business Data	**Simplified Backup for Business Data** Automatically back up files with features that enable businesses to restore accidentally deleted files and recover the data on the network that may have been lost in disastrous events. **Client Protection** Monitors client computers for antivirus status, update compliance, and overall security health. **Network-wide Protection** Complete, network-wide security with integrated state of the art protection technologies.
Simplify Small Business IT	**Simplified Management** From one administrative console, get a comprehensive view of the health and security of PCs and servers in a business environment, making it easier to manage common IT tasks and address technology issues before they occur. **Reliability** Help ensure that each PC on the network is secure by automatically managing the Windows firewall on business servers and PCs and configuring them to best practices. **Flexibility** Responds to changing business conditions with the flexibility to adjust email to the organization's unique needs and a simplified way to help keep email continuously available for end users.
Increase Business Productivity	**A Fully On-Premise Small Business Solution** Incorporates best-of-breed 64-bit product technologies to deliver a complete server solution environment well suited for small businesses. The product technologies include Exchange Server 2010, SharePoint Foundation 2010 and Windows Server Update Services. **Platform Scalability** Designed to provide a range of solutions tailored to meet the needs of small business customers at various stages of growth. Support critical line-of-business applications and run them on a secure award winning platform. **Online Collaboration** Get things done from virtually wherever and whenever. Using SharePoint 2010, users can share ideas and expertise, create custom solutions for specific needs, and find the right business information to make better decisions. **Remote Web Access** Enable your customers to stay connected by taking advantage of enterprise class email, contacts, calendar and communications with new Microsoft® Exchange Server 2010 Standard. Access is easy with the new and improved Remote Web Access.
Greater Business Insight	**Information Organization** Reduce the amount of time spent trying to manage, find and save business information—centrally store, organize, share and even search critical data. **Enhanced Support for Line-of-Business Applications *with Premium Add-On*** Run a vast number of line-of-business applications on an additional server, and enjoy the powerful data management and analysis solutions that makes it possible to use many server-based business applications.
